Seattle, WA 98101

7-830^{PM}
DOORS AT 630PM

INTERACTING

WITH

DESIGN

* Communities are impacted by developments in and around them. Large ideas can redefine the environment of a community, while smaller scale owners or buildings can draw new people to a neighborhood, using businesses and developments to come alive. This series focuses on the designers, owners, and developers that see the potential of drawing people into the communities and work together to make these visions a reality. Topics include large urban projects such as the new Waterfront, the reservoir parks, and the transportation stations plus small developments such as restaurants, civic buildings, and hospitals.

2011

RESERVOIR LID PROJECTS

Functioning Landscapes: Expanding Public Lands in Unlikely Places

Public spaces, such as parks over reservoir lids and day lighted creeks where parking lots once stood, redefine the use of previously unusable public lands and simultaneously generate new community developments around them. The neighborhoods become a draw to the area, and future growth is encouraged.

OCT 25

TRANSPORTATION

Transit Oriented Development

A panel of representatives from transit agencies, city planning, and architecture firms discuss transit oriented development from system / station planning to community engagement from the design process to built results.

NOV 15

2012

HOSPITAL DESIGN

Design that cures

Designers share their designs of childrens' hospital that redefine hospital design into spaces used as part of the healing process.

JAN 10

RESTAURANT DESIGN

Restaurateurs & Their Spaces: How design affects the dining experience

A roundtable discussion with leading restaurateurs in Seattle telling their stories of design decisions to create and compliment exceptional dining experiences.

FEB 07

CIVIC DESIGN

Staged for Transparency

Civic buildings have transformed their style of strength, and permanence through solid and powerful tructures and materials to be more transparent and inviting providing a sense of the public interacting with the institution. Speaker 1 and speaker 2 explore the new forms and techniques that provide security, interaction, and availability of the systems occurring within the buildings.

MAR 13

WATERFRONT

An Introduction to the Designer of the Seattle Waterfront

Get to know the designers of the Seattle waterfront sharing their notable projects around the world.
